Passage / data for Q.91-95 (December 2022 S1)

Read the passage and answer the questions that follow

U. Pagano and M.A. Rossi (2009) have advanced a hypothesis that states that, 'the crash of the knowledge economy is due to the intellectual monopolies, i.e. the huge protection inherent to Intellectual Property Rights (IPRs). The authors have stated - the institutions, which are facilitating IPRs are responsible for the crash. According to the authors, IPRs have acted as 'super-tariffs' as they have raised the cost of investment for countries that had neither abundant cheap labour nor high amounts of IPR resources. The IPRs may have subsequently exerted negative effect even on IP (Intellectual Property) rich firms or the conflicting rights of the firm may affect each other's investments and result in a situation of a savings glut. Therefore, the authors suggested - "if intellectual monopolies are one of the causes of the crash, the remedies should not only focus on monetary policy, financial regulation or even on standard Keynesian policies, rather regulation should be made to decrease the level of intellectual monopolization of economy". The policy measures they propose, however, aimed at redressing the balance between public and private knowledge, would not only have strong short-run super-multiplicative effects but would have long-run benefits as well.

Q17. Correctly state the hypothesis of Pagano and Rossi with regards to the crash of the knowledge economy. [December 2022 S1 · Q.91]

- (1) The root cause of the crash of knowledge economy is globalization, especially privatization.
- (2) The root cause of the crash of knowledge economy is the poverty and inequality in the less developed countries.
- (3) The root cause of the crash of the knowledge economy is the intellectual monopolies, i.e. the huge protection inherent to Intellectual Property Rights.
- (4) The root cause of the crash of the knowledge economy is the promotion of ample digitization in the world.

Q18. According to the authors, who is responsible for the crash of the knowledge economy?

[December 2022 S1 · Q.92]

- (1) The person/ organisations who file the patent for protection of IPRs.
- (2) The institutions which are facilitating IPRs.
- (3) The person/ organisations who are opposing to the IPRs.
- (4) The sluggishness of the technological progress in the world.

Q19. Why have the authors considered IPRs as a super tariff? [December 2022 S1 · Q.93]

- (1) There is a large scale reduction in tariffs but substantial increase in some sectors, in some countries, hence it is considered as a super tariff.
- (2) After the Uruguay Round, the tariff rate has declined multiple times and that boosts economic growth, hence it is considered as a super tariff.
- (3) The reduction in tariff has benefited the developed countries, hence it is called a super tariff.
- (4) The IPRs have raised the cost of investments for countries that had neither abundant cheap labour nor high amount of IPR resources, hence it acted as a super tariff.

Q20. How are the IPRs responsible for a savings glut? [December 2022 S1 · Q.94]

- (1) IPR has lead to economic growth, which has led to a savings glut.
- (2) The aggregate demand has fallen substantially and that has led to the savings glut.
- (3) The IPRs have given rise to conflicting rights for different firms, which has affected the volume of investment negatively and resulted in a situation of a savings glut.
- (4) The IPRs have led to poverty and that has led to a savings glut.

Q21. What remedies do the authors suggest for the knowledge economy to recover from the crisis? [December 2022 S1 · Q.95]

- (1) The author have suggested standard Keynesian policies to recover from the crisis of the knowledge economy.
- (2) The authors have suggested monetary policy to recover from the crisis of the knowledge economy.
- (3) The authors have suggested financial regulations to recover the crisis of the knowledge economy.
- (4) The recovery of the knowledge economy from the crisis can be achieved through the regulations, which can decrease the level of intellectual monopolisation (IPRs) in the economy.
